ISWSS15

Dear members of the Wadden Sea Community, dear Friends of the Wadden Sea,
Preparations for the 15th International Scientific Wadden Sea Symposium (ISWSS) are progressing.
We are pleased about the interest of numerous scientists and the many stimulating abstracts,
which have already been submitted for the symposium – thank you for that!

Unfortunately current developments in the corona pandemic have forced us to change our plans.
After consultation with the event locations in Büsum, the ISWSS will be
postponed to 30. November – 03. December 2021.

Those who have already registered for the symposium and received their ticket,
will be contacted directly. We will also contact anyone who has submitted an abstract.
We apologize for any inconvenience and hope that you are still able to take part in the symposium
at the end of 2021!

Please visit <http://www.waddensea-worldheritage.org/ISWSS15> to sign up, see the current programme,
the event location and possible accommodation. Please feel free to distribute this information within
your networks.

Take care and stay healthy!

We are looking forward to meeting you in Büsum next year!
